**Attachments:** WRO Referral Form to EPA RE Johnson.pdf

Classification: UNCLASSIFIED  
Caveats: NONE

Hi Dick,

Sorry about the incomplete referral form. I dated today even though it was sent back in December just so it does not appear something unusual is going on in case this ever moves to litigation.

As you know, Jesse Fernandes was an intern working here and had no experience with enforcement. Kevin took over the matter from her. We sent the form in at a time when we were advised to try informal coordination before formal coordination. We have decided, at least as an office, to provide formal notification on all referrals henceforth.

Kevin is the project manager. He took advantage of the lull (end?) in spring snow storms today make a relatively local site visit at the request of a landowner. He may be available to visit the site with you on May 30th if you go but I will have him coordinate that with you. We have a tight travel budget this year with a specific amount of funds set aside. So, we are going to try and coordinate our program trips to get the most out of that budget.

Really appreciate you guys taking this on. The alleged violator has made a lot of statements about not knowing about our program that seem to be contradicted by the facts. It is a pretty big and obvious structure and has particularly upset some of his neighbors besides being a violation.

I'll cc Kevin on this so he knows what's going on and can advise you if he can make a site visit with you.

Thanks!

Matt Bilodeau
